

1	Paper Title TEMPLATE OF PAPERS FOR LibreOffice
2	LLM Hallucination in High-Stakes Professional Domains: A Comparative.....
3	Cut-In Detection in ADAS Using a Dual-Threshold TTC/Lateral-Jerk Criterion: A Preliminary Evaluation on the highD Dataset
4	Evaluating Prompt Engineering Techniques for LLM-Based Test Case Generation in Automotive ADAS Development
5	Bayesian Item Response Analysis of Data Science Reskilling Assessment Items: A Two-Year Comparison (2022–2023)
6	V2X-Based Cut-in Negotiation with Micro-Tip Protocol: A Cooperative Approach to Equitable Lane-Changing in Mixed Autonomous-Human Traffic
7	Beyond Black-Box AI: Closed-Loop Simulation and Open Standards for Next-Generation Systems
8	Artificial Intimacy and Intelligence Illusions: Navigating Trust, Bias, and Sustainability in AI.
9	Technological Singularity: The Ultimate Trajectory of Recursive Self-Improvement in Automated Science
10	DETERMINISTIC LOGICAL CORE ARCHITECTURE (DLCA)
11	AI Catalyst for Quantum and Computational Chemistry
12	ON Nova-Nox-Neural-Network
	Submissions to OpenReview are currently disabled due to the ongoing peer-review process; submission and peer review are mutually exclusive states. Submissions are scheduled to reopen on or after July 11.
